

## JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

During their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could quickly and safely elevate people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John formed a joint venture with two friends and acquired a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The company incorporates many of the simple design elements of that original lift into current models.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into various markets globally and develops new products to make certain clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
